Fluted pumpkin farming in nigeria pdf files pdf download full

observed in the study that the majority of the fluted pumpkin growers were females, married, relatively educated, and within productive age. A modified cost route approach was used to collect primary data from producers. Google Scholar Baiyeri K.P. 1996. A high productivity ratio was recorded by 39% of the fluted pumpkin growers due to exposure to agricultural forums and extension visits. Food Chem. Descriptive statistics, as well as a stochastic frontier production function, were used to analyze the data, and estimate the efficiency of producers. E. Google Scholar Bressani, R. Bot., 37, 145eAA49.CrossRef Google Scholar Zucker, H., Hays, V.W., Speer, V.C. and Catron, D.V. (1958) Evaluation of pumpkin seed meal as a source of protein using a depletion-repletion technique. Food Agric, 38, 237eAA46CrossRef CAS Google Scholar Okoli, B.E. and Mgbesogu, C.M. Productivity differences across the state varied significantly with higher productivity estimates. The profit function analysis result gave N145,309.1, indicating economic viability and profitability of fluted pumpkin. Data were analyzed using both descriptive and inferential statistics. Agricult.
